

HLIX

Forging Open Innovation Driven by Collective Intelligence

Executive Overview: DTR (Developer Technology Research) is a research consortium of bleeding-edge enterprise technologists that are focusing on Kubernetes, Blockchain, and Quantum Mathematics. The leaders have a track record of leading Fortune 500 including Microsoft, CISCO, Amazon, D2iQ (Acq. By Nutanix) Everpure (PSTG) Their mission is to support the \$9T Market of Open Source & Enterprise Digital Infrastructure Ecosystem.

DTR's Flagship Product, HLIX is an enterprise application and compute coordination platform which unlocks the economic value of idle compute by enabling workload routing, data migrations, infrastructure interoperability, and resale of unused compute capacity across global cloud and data center environments.

DTR is raising capital to activate signed LOIs, accelerate HLIX product development, and deploy revenue-generating infrastructure at scale. The Team has raised \$175k to date via SAFE Notes through private investors and investment funds.

What HLIX Will Deliver

Quantum-like data migration efficiency w/ significant cost savings

3x compute performance increase (against cpu baseline) with compounding economic benefit

Idle compute exchange unlocking new revenue streams

Future-proofing integrated next-gen quantum-immune security layer

Accomplishments to Date

3 active & Pending LOIs totaling \$1.32B in contract value to convert post-funding and General Availability (**Launch**)

Developer community of 3.1M+ awaiting access to idle compute exchange

Cohesive, vision-aligned leadership spanning technical and operation functions

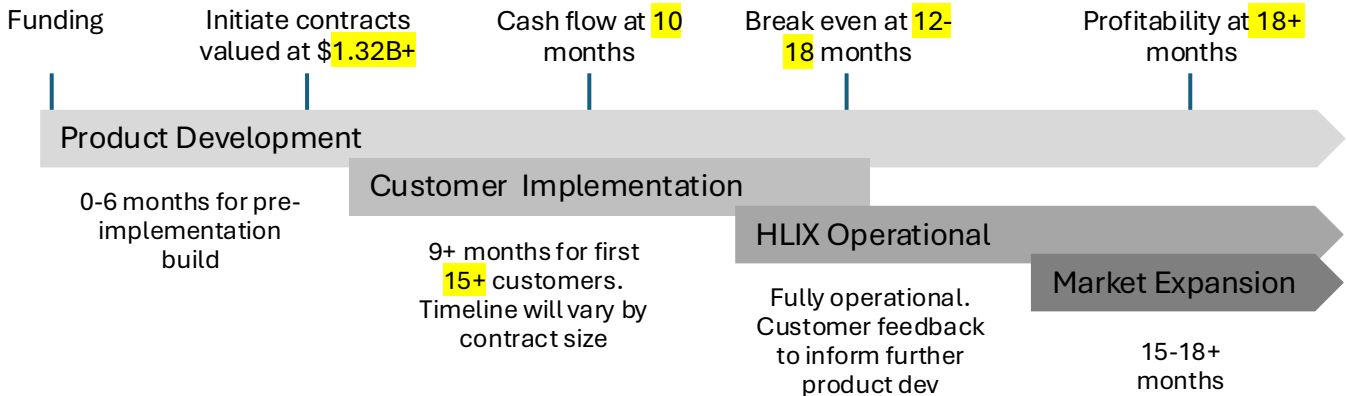

Key strategic alliances enabling priority access to differentiating technology

Category	Legacy VMware / OpenShift	DTR HLIX
Virtualization License (100 VM Example)	\$500,000	\$150,000
Container Platform License	~\$4,500 / year	Included in platform
Total Platform Cost / Server	~\$14,000 / year	~\$4,000 avg
AWS Data Migration (1PB)	~\$90,000 egress for data	Near Zero via: UOR Portability & Lossless References (Compression)
Infrastructure Utilization (Tenants)	15–30% typical	70–95% via workload routing
Idle Compute Monetization	None (wasted compute)	\$1,500,000+ In Idle compute resale per 100 GPU Cluster
AI Model Footprint (Example)	~700GB (GPT-3 class)	~50KB representation
Energy Efficiency	High power footprint	Orders of magnitude reduction in model footprint & distribution overhead

HLIX

Forging Open Innovation
Driven by Collective
Intelligence

Beachhead markets prioritized by highest near-term growth and market capture potential

Data Centers

Finance

Telcom

Defense

Strategic Advantages & Differentiators

First-to-market, bleeding edge enterprise-grade cloud-to-chain idle compute platform. **High-value LOIs** supporting rapid growth and market leadership opportunity

Community of 3M+ awaiting access to HLIx's idle compute exchange

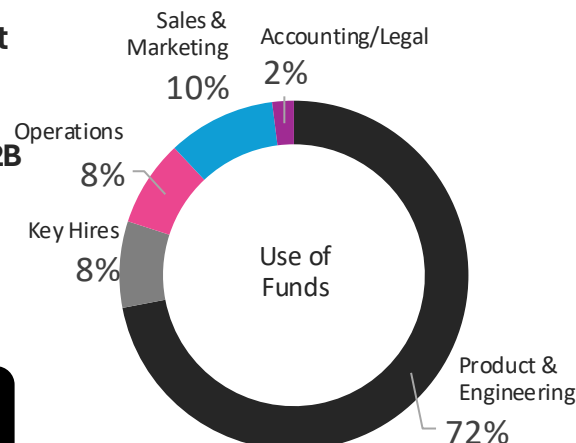

Superior cost-to-value vs. competitors in the data virtualization category

Leadership composite with robust industry networks and influence

Opportunity

\$12.5M Seed Round for an 18-month runway that will enable DTR to:

- Execute on pending and in-hand LOIs exceeding \$1.32B
- Fuel rapid product development
- Increase sales and marketing efforts
- Reach \$64M+ ARR by Y2
